LUMOMATE | ABOUT

LumoMate is a specialised automatic voltage regulator designed to control the voltage level delivered to street, carpark or outdoor area lighting. **LumoMate** has an inbuilt capability for photocells (PE) and/or luminance sensors.

Regulating street or outdoor voltage has a number of benefits, the most important of these are reduction in energy usage and prolonged light life. **LumoMate** can be programmed to managed luminesces levels as required during the twilight and late night hours to further reduce energy consumption.

LUMOMATE | FEATURES

- Intelligent lighting control ✓
- Lighting control by photocells ✓
- Luminance control by voltage regulation ✓
- Reduced power consumption ✓
- Ability to set "off peak" times to reduce light pollution ✓
