

MONIMATETM

powered by ENRAMS

MONIMATE | ABOUT

MoniMate is an intelligent data input and output storage module, within **EnergyMate**.

MoniMate manages the collection, storage and analysis of the data captured by **EnergyMate's** on-board meters. This data is accessible via the internet and presented in a client customised dashboard.

Analysis of historical data can provide opportunities for further reductions in energy consumption by implementing habitual change management which, can be as simple as when to use a particular equipment.

MONIMATE | FEATURES

Fully integrated with the EnergyMate Automatic Voltage Regulator 

Dashboard set up 

Provides access to real time consumption and savings data (kWh, costs, and greenhouse gas emissions) 

Capable of electrical sub circuit monitoring (i.e. air conditioning) 

Adaptable; will accept other inputs (air pressure and water consumption) 

Provides alarms 

Is the basis of a building management system
